DETAILED ACTION

1. The amendment filed December 18, 2006 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material, which is not supported by the original disclosure, is as follows: the projections of the felt being formed by the stitching material do not have support in the specification. The closest disclosure to this limitation is the statement on the first paragraph of page 8, which state that a butterfly patter is stitched to the felt and that the butterfly pattern contains yarn, but this statement does not mean that the stitching material form the pattern, only that it is stitched, i.e., the yarn is stitched to the felt, not that the stitching material forms the pattern.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 9-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. See above.

Art Unit: 1731

Allowable Subject Matter

4. Claims 9-22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1st paragraph, set forth in this Office action.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach nor fairly suggest a method of making tissue using an imprinting felt in which the pattern is formed with an stitching material, as claimed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure in the art of "Method of making tissues."
